

# Deodorizing System

- Powerful deodorizing Feature
- Durability : inspection needed regularly
- Safety : no hazardous factors
- Installed catalyst concentrates on eliminating the odor (ammonia, amino compounds, hydrogen sulfide).

● **Air circulating drying system**

This product, using air circulating drying method, eliminates moisture, Malodor, bacteria. And it reduces the volume dramatically. Air circulating drying system is odorless and eliminates germs, putrefactive bacteria promoting sanitary process. It treats all different kinds of food waste. It doesn't need complicated installation. Plug it in and ready to run. Its unique and advanced structure provides better performance and power consumption than any other products.

**Reduced to 1/5 of the original size**

- For air circulation drying method, you don't need to separate food(shell, big bone, etc) You just put in waste anytime it is produced.
- Food waste gets dried before it spoils, therefore it is certainly hygienic.
- After a cycle volume of the waste is reduced and stored in the basket. You only have to remove it 2 or 3 times a month assuming 400g of waste is produced daily.
- We upgraded the performance resulting less processing time and less power consumption. You can save time and money at the same time.
